Research Interests

My research centers on **multimodal agents** that perceive, reason, and act over images, videos, and documents; **self-evolving agents** that improve from their own experience through **recursive self-improvement (RSI)** of models and agent harnesses; and **agentic reinforcement learning** that trains agents to reason, use tools, and reflect reliably. I am particularly interested in agentic video understanding, editing, and generation; reasoning-driven document editing; tool use and multi-agent coordination; with applications in medical AI and personalization.

Education

University of California, Davis Jan. 2025–Present
Ph.D. in Computer Science Advisor: Prof. Lifu Huang

Virginia Tech Aug. 2023–Dec. 2024
Ph.D. studies in Computer and Information Sciences; transferred with advisor to UC Davis.

Duke University Aug. 2020–Dec. 2022
M.S. in Electrical and Computer Engineering

Southern University of Science and Technology Sep. 2015–Jul. 2019
B.S. in Financial Mathematics

Research and Internship Experience

Meta, MRS Research Team Jun. 2026–Sep. 2026
Research Scientist Intern Host: Qifan Wang
Structured recursive self-improvement for video understanding harnesses (VideoHarness-SRSI).

Adobe Research Jun. 2025–Nov. 2025
Research Scientist Intern Host: Wanrong Zhu
Reasoning-based editing of multi-layer design documents (MiLDEdit).

Adobe Research May 2024–Nov. 2024
Research Scientist Intern Host: Zichao (Jack) Wang
Personalized suggested-question generation for document assistants (Persona-SQ).
